Connecting to Fundist.org API – NetEnt system

Contents

Change History

1.00	25 Sep 2014	Initial version of NetEnt integration notes
1.01	20 Jan 2015	Added DateOfBirth and Gender as mandatory parameters for NetEnt due to legislation requirements

Implementation notes

- Demo play is supported
- **User/DirectAuth API request is NOT support, use User/AuthHTML**
  - Please make sure that **Country, RegistrationIP, DateOfBirth** and **Gender** parameters are provided to **User/Add** API call
  - Please make sure that **UserIP** parameter is provided to User/AuthHTML
- Available games can be retrieved through **Games/List** API (caching is strongly encouraged)
- Desktop Client notes:
  - **jQuery** is prerequisite for integration
  - There is a special element "`<span id="egamings_container"></span>`", which is replaced with Flash object using SWFObject (https://code.google.com/p/swfobject/)
  - The default Flash object dimensions usually are 640x480. However, if "`#egamings_container`" has non-zero height and width then those are used by default.
  - Please use CSS to setup "`#egamings_container`" dimension like:

    "`#egamings_container{ width: 900px; height: 700px; }`"
- Mobile Client notes:
  - <iframe> integration is not supported due to inability to get device orientation and viewport zoom level within game
  - Landscape orientation is required
  - System/OS requirements (one of):
    - Chrome 25 on Android 4.0 or higher
    - Chrome 25 on iOS 5 or higher
    - Safari on iOS 5 or higher
    - Stock browser on Android 2.3/4.0 or higher
    - Other may work as well, but not tested. Games are optimized for Safari on iOS and Chrome on Android.
  - Android 3.x is NOT supported
  - Some low-end Android hardware may not be supported
- WebSockets must be supported, if HTTP(S) proxy server is used
- Restricted zones:
  - UK
  - Iran

- North Korea

Appendix N1. Merchant system IDs

System ID	System name
992	NetEnt
